

Introductory Robotics Unit

Marianna O'Brien
Lincoln Middle School
Spring 2004

Day 15 - 20

Objective: Students will identify the many parts in each kit by taking inventory and performing basic cost analysis of parts.

Materials:

- One LEGO Mindstorm Team Challenge Set, including the instruction book per team
- One clear box or shoe box with lid per team
- PC with the internet access
- One three - ring binder for team work
- One reduced (74%) copy of parts list (on reverse of box cover) per team

Lessons:

Students will calculate the 10 most expensive parts in each kit.

Students will construct a Word document and Insert a four - column table (below) for all parts.

Picture	Name – description of part	Cost/ bundle	Unit Price

Students are to use <http://www.pldstore.com/pld/> to obtain a picture, name, description, and bundle price.

Students should calculate unit price. Remind them how to do this.

Students are to use the reduced inventory sheet to account for all parts.

Assessment:

Check that students are doing this properly.

Whole class – Share which 10 parts are the most expensive.
