

TEJAS CHETHAN RAM

2620 Severance Street, Apt #10, Los Angeles, California, 90007 | tejasram@usc.edu | (213) 422 4441

EDUCATION

M.S Computer Science Engineering | University of Southern California, California

Dec '15

Specialization: Intelligent Robotics, Artificial Intelligence, Web Development

Student Technical Assistant at ITS (Information Technology Services), University of Southern California

Researching on developing components of a service robot for human-robot task collaborations with older adults

B.E Electronics and Communication | Visvesvaraya Technological University (VTU), India

Jun '13

Specialization: Micro-Controllers, Analog and Digital Circuit Design

SKILLS

Programming Lang - Proficient: JAVA, Python, HTML, CSS, PHP, JavaScript, jQuery, **Experience:** C++, C, SQL, Embedded C

Development Tools - Eclipse, IDLE, MATLAB, Visual Studio, ORCAD, ModelSim Xlink9.0, Microwind, PSPICE, DSCH3.1

VLSI Programming - Verilog, HDL, **Database -** MySQL

ACADEMIC PROJECT EXPERIENCE

E-Commerce Website Design | Individual Project

- Designed both frontend and backend of a website for product sales and report generation, using HTML.
- Developed a products database and modified, retrieved data using complex SQL sub queries and functions.
- Integrated a dynamic interactive UI and a complex search tool to retrieve product details from database.
- Designed the cart feature using PHP and maintained customer profiles similar to Amazon website.
- Developed a responsive dynamic website for mobile devices and converted it into a MVC (Model View Controller).
- The frontend of the website can be viewed at: http://cs-server.usc.edu:55443/codeigniter/index.php/main_con
- URL for the code: <https://drive.google.com/folderview?id=0B7P8uq4jW5PdTTVxb0ZhZzBvclE&usp=sharing>

Hovercraft | Role: Robotic design and development Engineer

- Designed a robust Hovercraft, using brushless CPU fans on Intel Galileo Board using Arduino.
- Implemented Line tracing functionality in the robot, using IR sensors and calculated the traversed distance of the robot.
- Developed feedback system and stabilized the movements of the robot by developing PID controller using Arduino.

Quadbot | Role: Team Leader

- Integrated an aerial robot (quad rotor) with a Quadruped crawler maintaining its autonomous control.
- The crawler was designed using P89V51RD2 controller board and had 3 servos per leg which provided a lot of flexibility.
- Designed a stable Flight system using Arduino multi-Wii platform which served as a surveillance system.
- Implemented an autonomous maneuverability using a robust sensor system.

WORK EXPERIENCE

Ram Tecnoz, CEO

'11 – '13

- A self-startup aiming in providing smart gadgets using robotic solutions, focusing on renewable energy usage.
- Designed and manufactured automatic night switches, solar powered smart lamps.
- Provided support to clients by customizing water level indicators, timer ports etc , based on client's requirement.
- Successfully Served 25 clients in the circuit design and manufacturing domain.
- Trained 50 undergraduate students and provided hands on experience in Circuit designing, Basic Robotics projects.

ACHIEVEMENTS AND SIGNIFICANT POSITIONS HELD

- Built a Hovercraft in a team of 5 and won Intel hardware hackathon, University of Southern California.
- Designed and implemented a line tracer robot using K-map and logic design in high school.
- Student Coordinator, Emitters (Electronics Students Association), Maharaja Institute of Technology.
- Placement Coordinator, Placement Cell, Maharaja Institute of Technology.
- Event Manager, National Entrepreneurship Network (NEN), INDIA.
